ACROW
Formwork Technology

Introduction

Being one of the largest formwork and scaffolding companies in Egypt, We are introducing the Big Steel Panels Formwork System.

Advantages of big steel panel:

•It is one of the most economical systems for special applications.

•It can be easily erected, adjusted and dismantled

•It is by made high manufacturing techniques.

•The release agent coating minimizes the concrete adhesion.

Acrow Big Steel Panel For Bridge Pier Crown

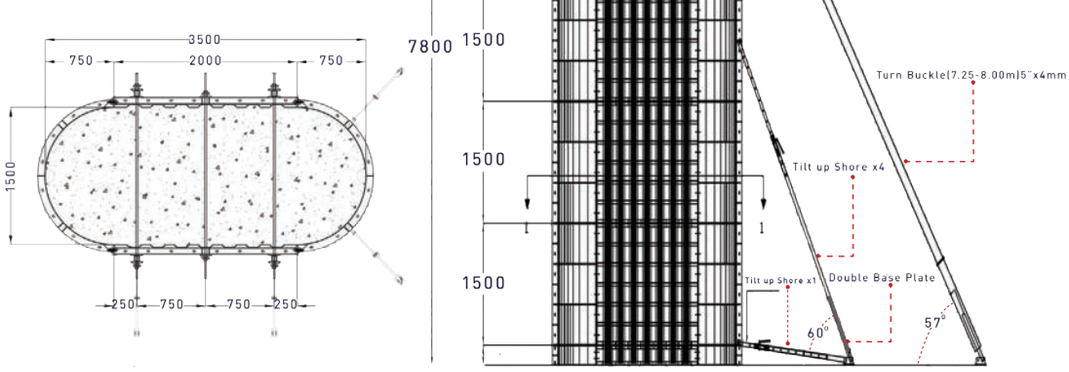

Project : Cairo Alex Road Bridge
Location : Egypt

Acrow big steel panel is the most suitable system for bridge pier crown, where special shapes and complicated architecture texture are easily achieved using big steel panel formwork rather than modular systems.

Pier crown height=7.80 width=3.50m

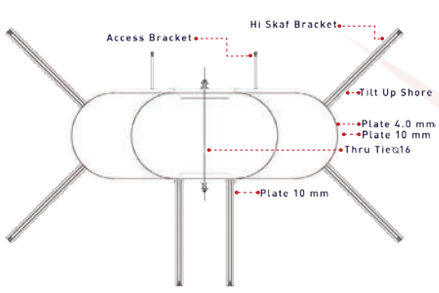

- Steel panel width = 2 m.
- Steel panel Height = 1.5 m.
- Curved steel panel = 1.5 m.
- Face crown width = 3.5 m to 5 m Height = 3.05 m
- Side crown width = 1.5 m Height = 3.05 m

Big Steel Panel System with one level of W/S Ties (H = 7.40 m)

•The tank main walls are tapered with thickness of (0.3 - 0.75 m) and height of 7.40 m.
•The tank walls are poured horizontally in several stages and vertically in one shot.
•To minimize the lost items, the formwork is provided with truss soldiers, supported only by two levels of ties, only one tie level in concrete (w\s tie) and the other is above concrete finish level (thru tie).
•Steel panels sheeting are utilized for obtaining durable and multiple re-uses applications.
•The crane handling for the system results in faster time of erection and minimizes the labor cost.
•Also the gutter wall formwork is designed to enable one shot pouring.

Acrow Big Steel For Tunnel Form

All the inside forms move on wheels:
•Acrow steel panel system has been successfully used for monolithic tunnel formwork. The main system advantage is that it enables a one shot pour for the slab and walls together.
•The inner formwork is equipped by wheels in order to be moved easily form one stage to another.
•The outer formwork can be either moved by wheel or crane according the surrounding site conditions.
•Acrow misr also designs, forms, assembles, and supplies special tunnel form shapes upon request.

Double Culvert

Single Culvert

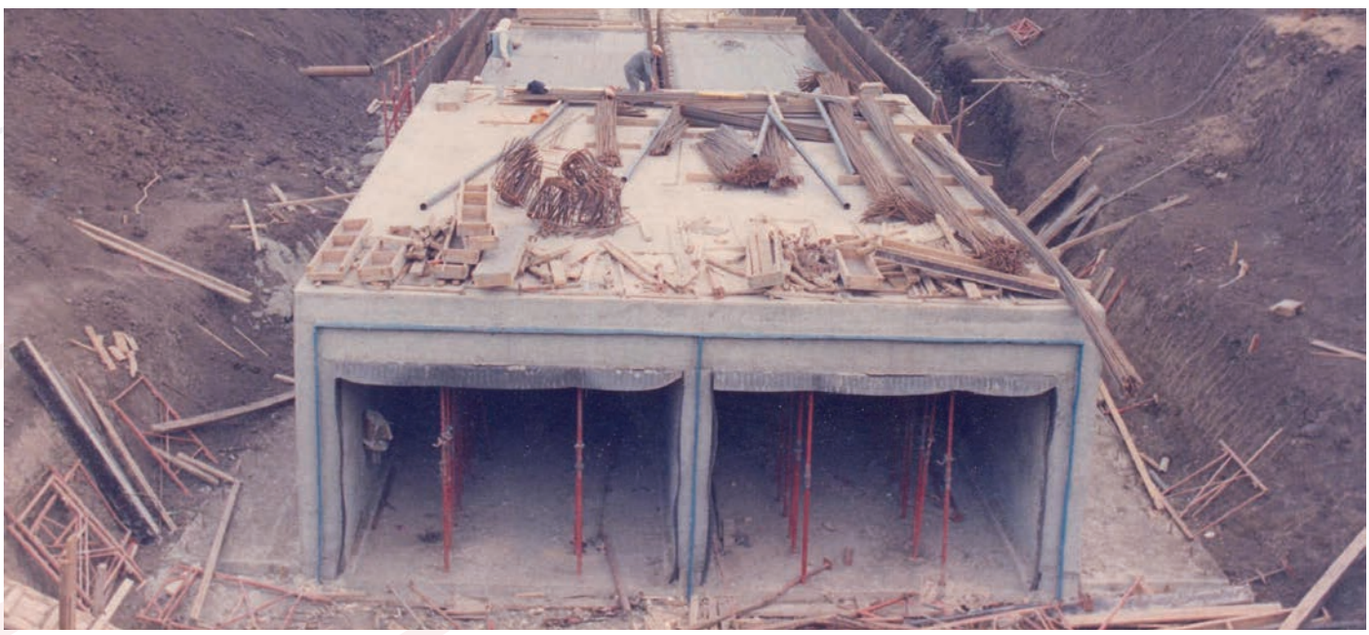

Horse Shoe Culvert (move on wheels)

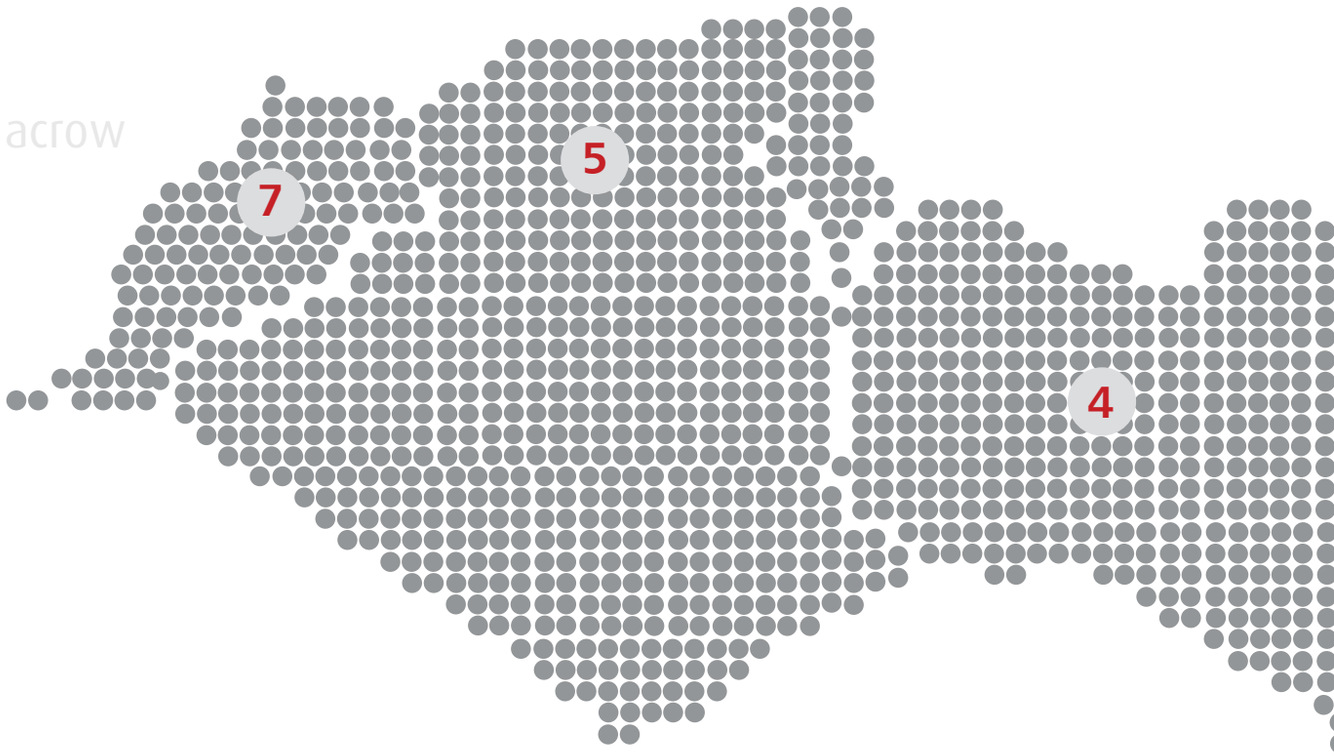

Acrow Big Steel Panel For Tunnel Form

Advantages of tunnel formwork:
•Easy to use in site
•Monolithic reinforced walling formwork system
•It enables fast track construction
•It proved to be cost effective system
•Transferrable construction technology
•It is reusable system which could be used many times.
•It is characterized by its light weight.
•It is a time effective system which enables fast and speedy tunneling formwork and construction.
