ACROW
Formwork Technology

Introduction

Acrow combishore is an innovative shoring system which combines the advantage of a frame base shoring system and the big range of application of ring-systems.
This system is the most versatile for fast assembly and total free in adaptation of the shoring.

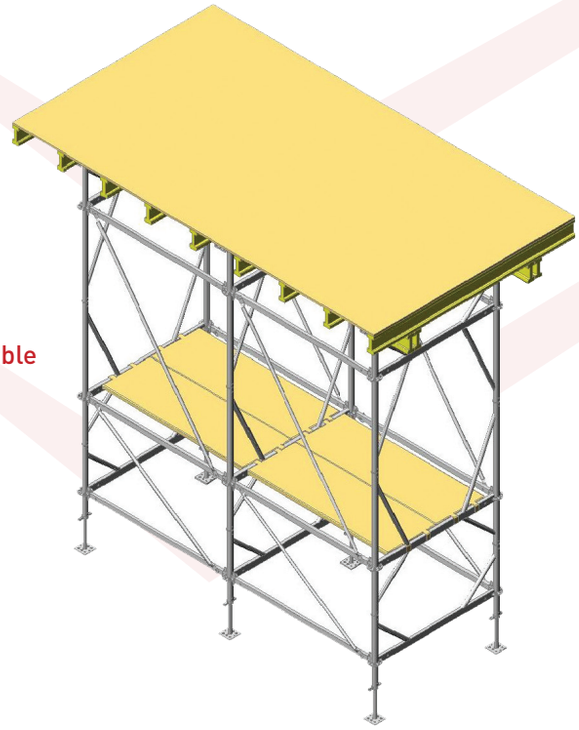

Other Advantages:

•Easy to handle for a fast assembling:
-Because of the low weight and the ergonomic optimized geometry of the parts.
-Small number of components.
-Self explaining assembly sequence.

•Cost efficient for all shoring of building construction:
-Ideal in use for slabs heights more than 4.0 m.
-Very adaptable for taking the load, because of versatile distances of the legs.
-combined frames and single legs.

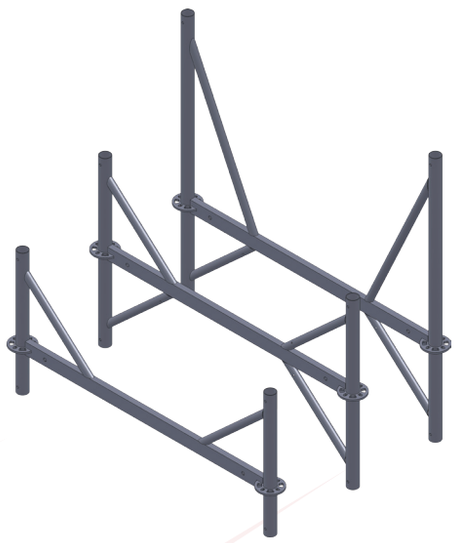

•Maximum safety:
-Also in supporting slab edges.
–Because of the easy and safe connection of brackets.

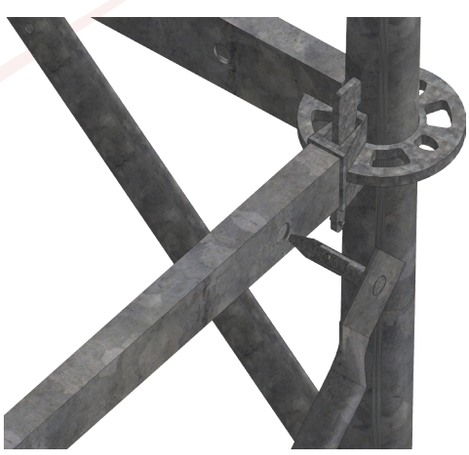

Combishore table

Product Features

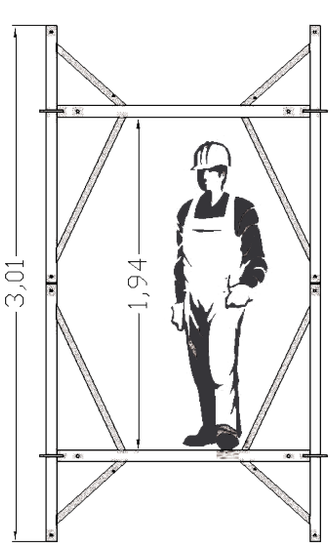

- Only 3 sizes of frames (150 cm width)
  - 75 cm ---------- 14.40 kg
  - 100 cm ---------- 18.40 kg
  - 150 cm ---------- 23.80 kg

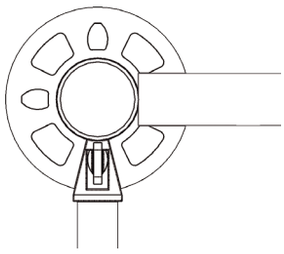

- All frames with ring connection:
  - Easy connection of ledgers.
  - To connect new frames or single legs.
  - Using only hammer -no tools.

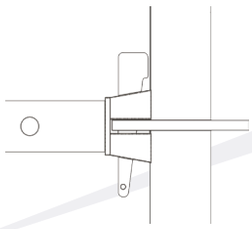

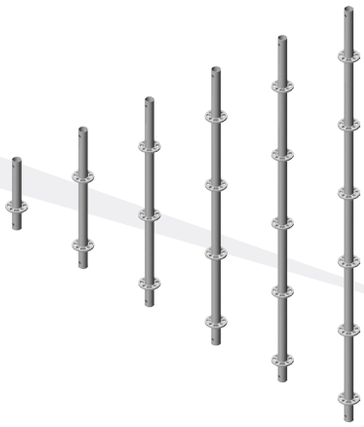

- Free walking and working on platforms:
  - different levels can be covered with blanks.

Ring lock system combine and integrated in combishore

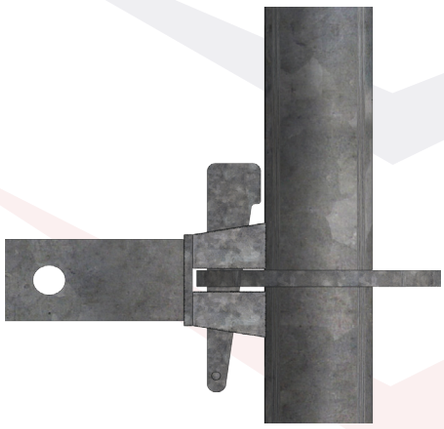

"Ring connection" of the ledgers to the frames and to the sigle legs

Different sizes of horizontal ledgers:

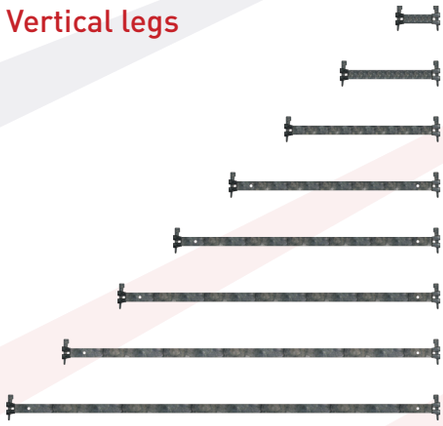

- Connected by the ring connection with a hammer.

Sizes of ledgers:

30 / 60 / 90 / 120 / 150 / 180 / 210 / 240 cm

Vertical legs

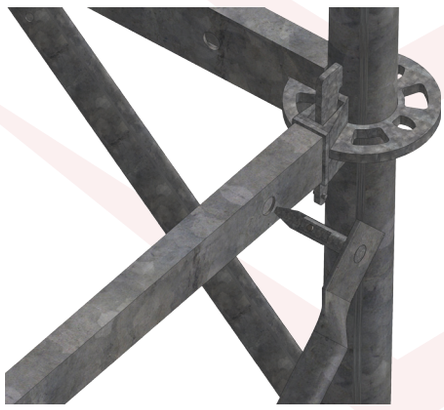

One-man connection of the diagonals to the ledgers

- because of a special connector on thediagonals.

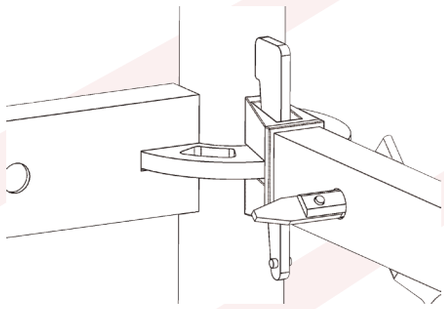

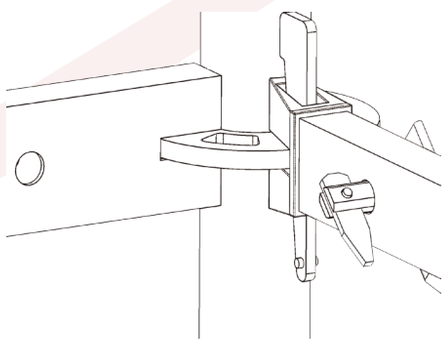

Just a self locking pin

Diagonals available for all combination of ledgers and frames

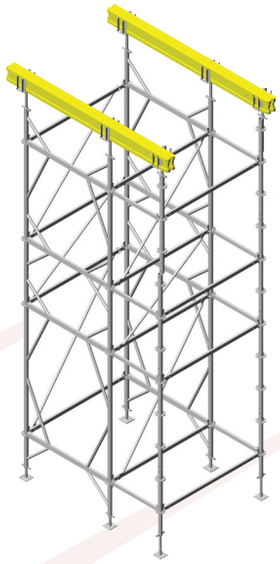

Fast connector locking pin

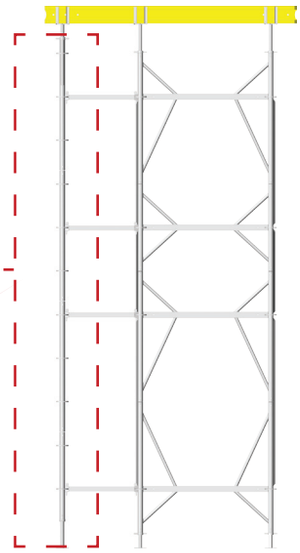

Adaptable to the taken loads

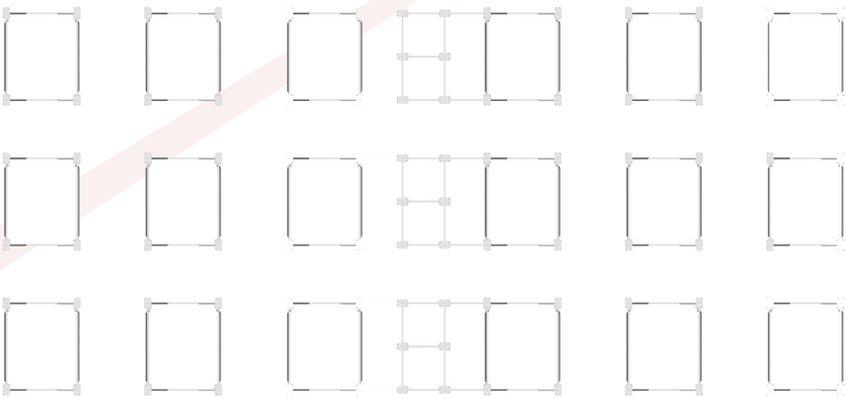

- Because of different distances of the legs and combine frames and single legs.

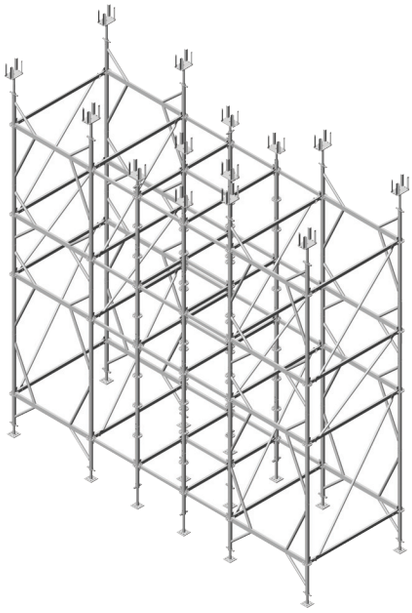

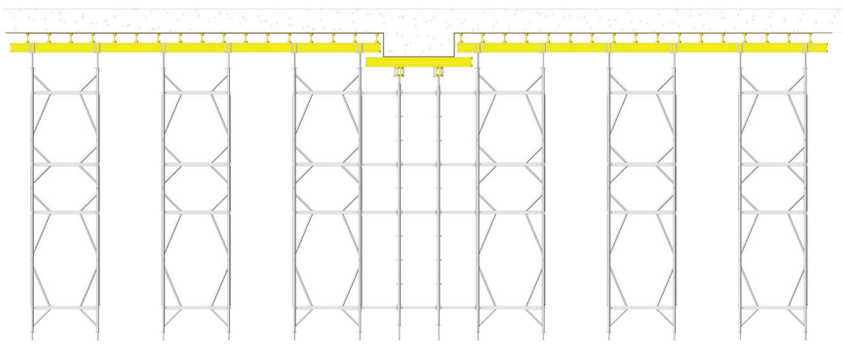

Frames complemented with rings for connecting single legs to the frames.

Example of combishore with single legs

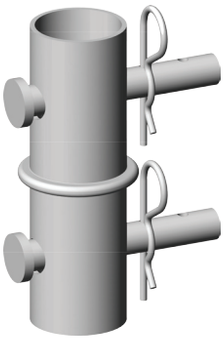

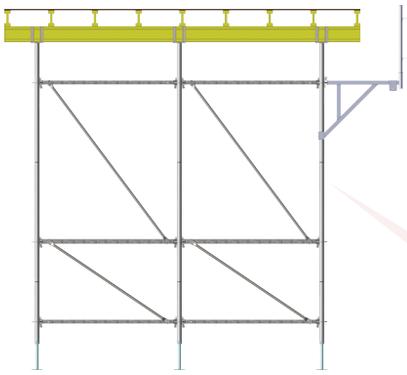

Easy extensions by frame connector

•Good connection for transfeing the loads.
•Safe because of tension proof by bolts (crane transport).

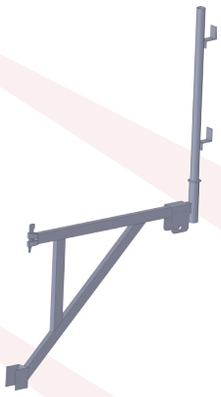

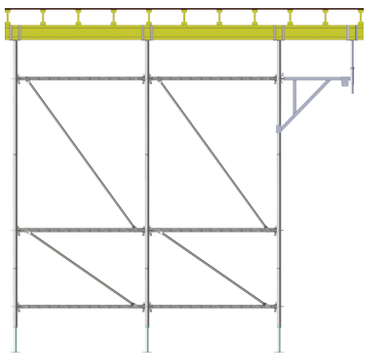

Simple and safe connection of brackets to the frame ring.

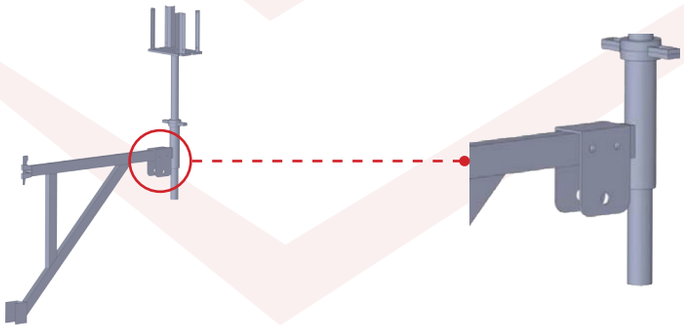

Extension with handrail post.

Handrail post for working platforms.

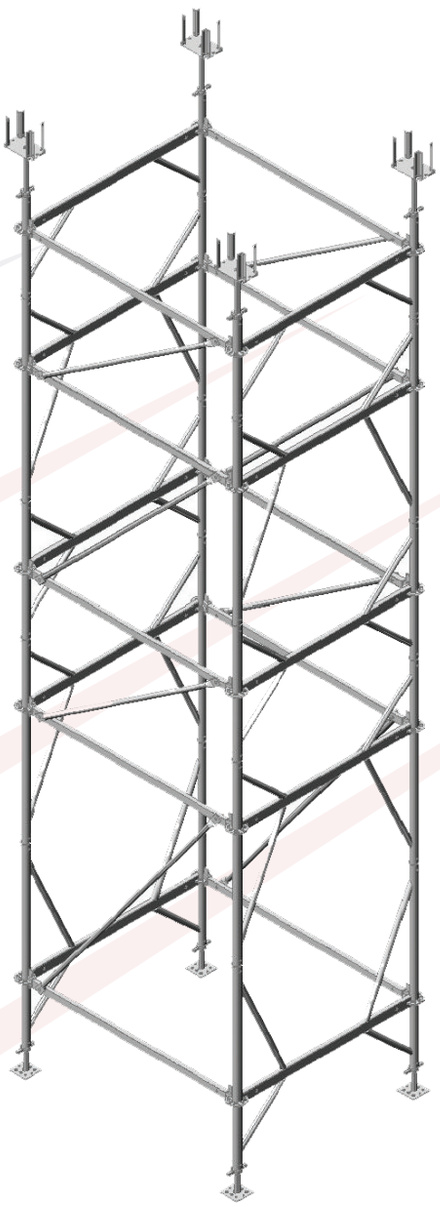

Extension with U head jack.

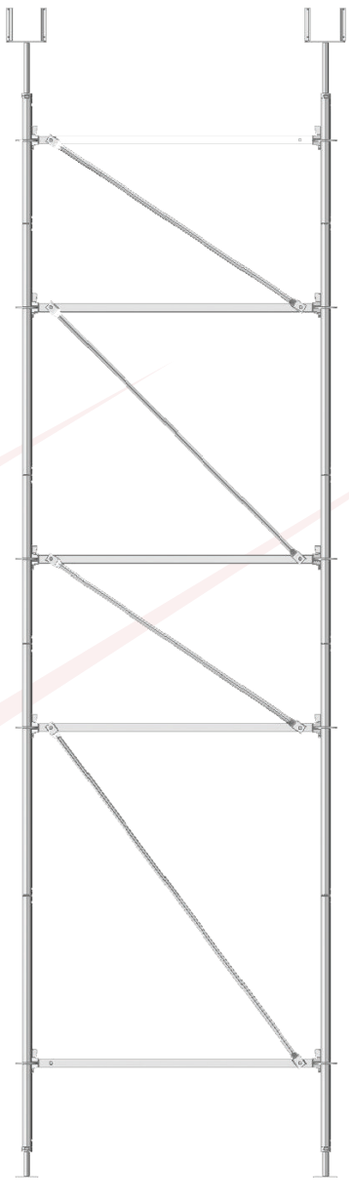

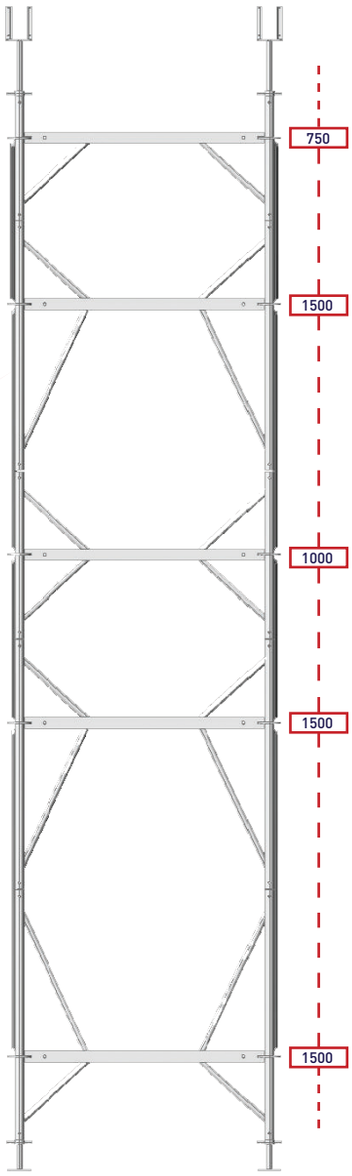

•Specially to support slab edges.
•To connect spindles.

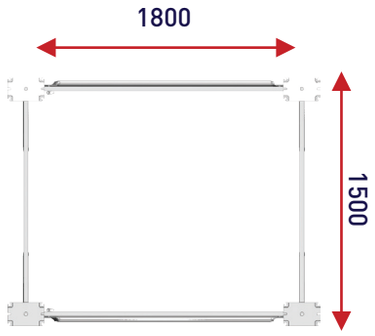

Heavy duty spindle could be connected to the bracket for transfering the loads to the slab.

Example of applications and combinatons
