ACROW Formwork Technology

Introduction

Due to long experience of Acrow misr as being enrolled in many major projects over the past 20 years, we are introducing our one sided wall shutter.

Supporting frame

Advantage for supporting frame for wall height up to 7.60 M:

•The A, B, C acrow supporting frames with various combinations enables any wall height up to 7.60 m to be poured in one shot.

•For wall with variable heights, the A, B, C supporting frames can be separately used to shutter small heights, after that they can be connected together vertically to get a higher wall section.

•The modular supporting frames can be easily connected without the need of any additional parts.

•The top of any A, B, C supporting frame can be used as an access platform by adding handrail posts.

•The individual parts dimensions are fit for a lorry or sized container.

•It can be customized with different shuttering systems.

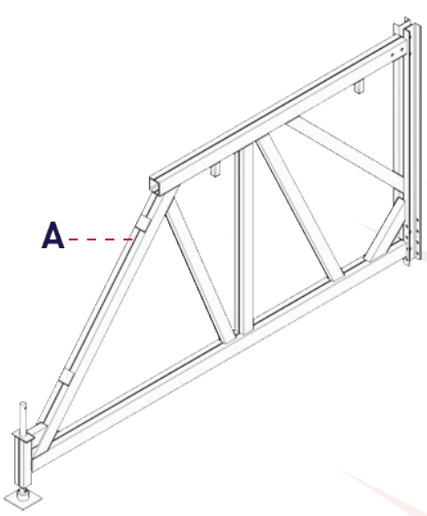

•Each frame can be braced using scaffolding tubes.

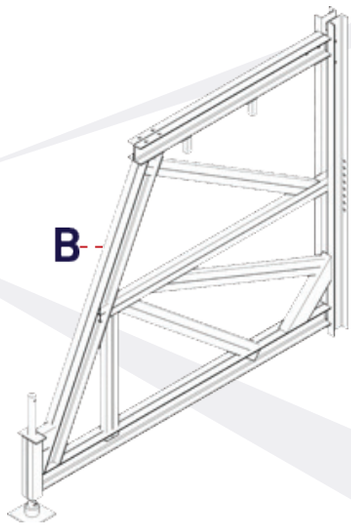

Supporting Frame Overview

The A, B, C supporting frames can be easily connected to get the variable heights in order to set the wall formwork height.

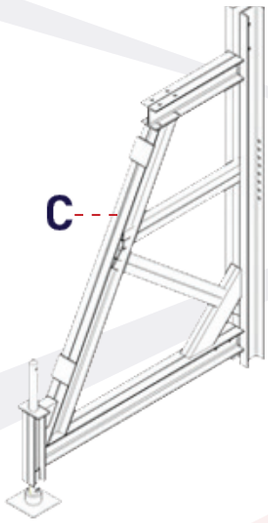

Different cases of using frame (A) or (B) or (C)

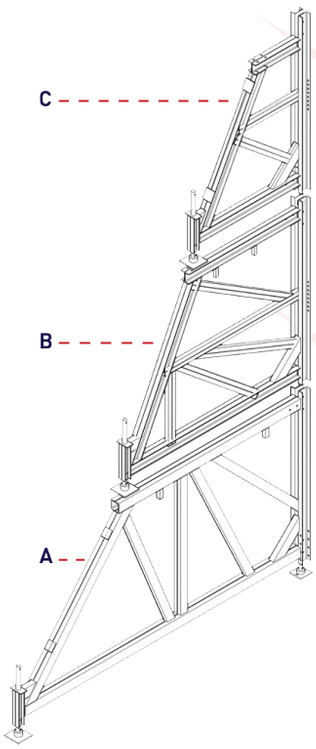

Supporting frame height = (2105) m
formwork height = (2600) m

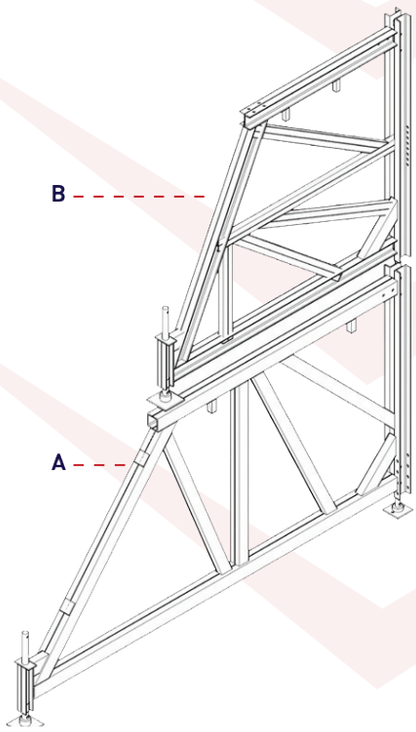

Supporting frame height = (2240) m
formwork height = (3000) m

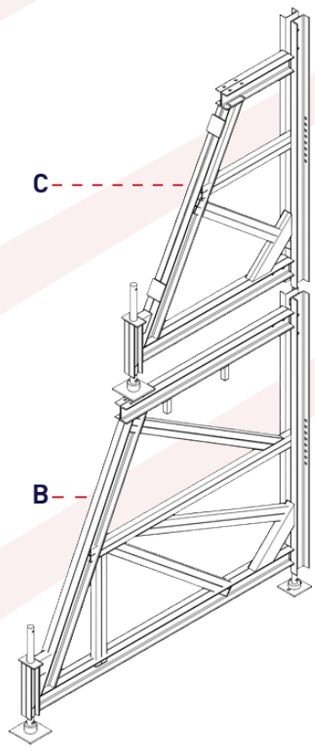

Supporting frame height = (2158) m
formwork height = (3000) m

connecting A,B and C to get formwork height (7600) m

connecting A and B to get formwork height (5000) m

connecting B and C to get formwork height (5000) m

Vertical Solider Up To 4.0 M

•Acrow one-sided wall form is strong and flexible. The distance between elements is calculated according to the wall height and the concrete pressure. The form is plumbed using jacks at the base

•Supporting elements transfer the forces through the anchors embedded in the concrete and the rear pressure jack on the bracket.

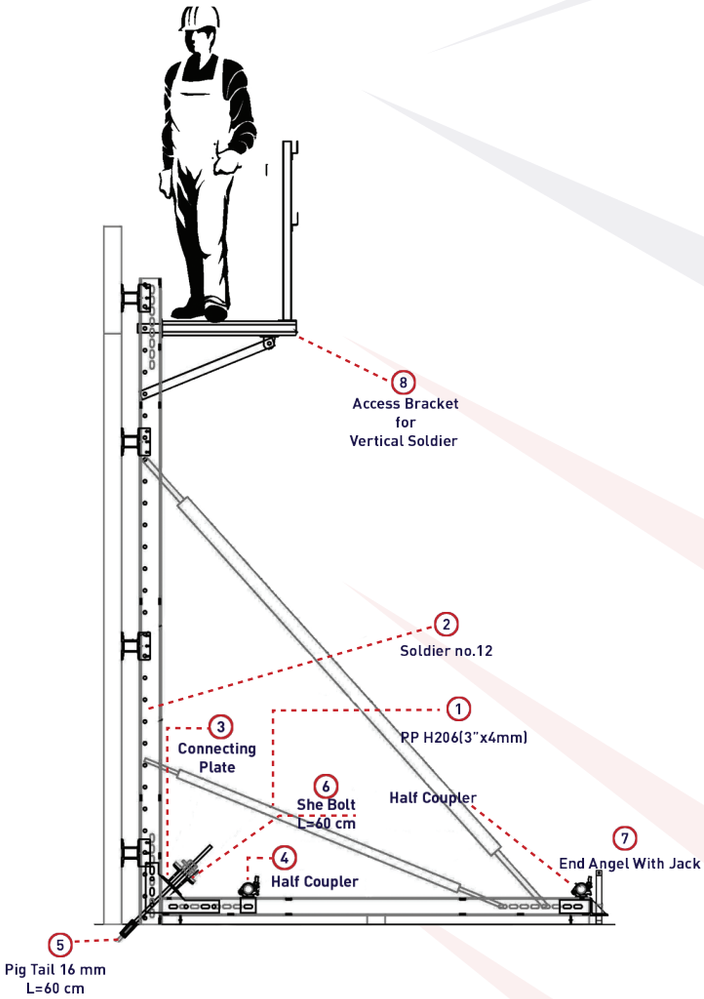

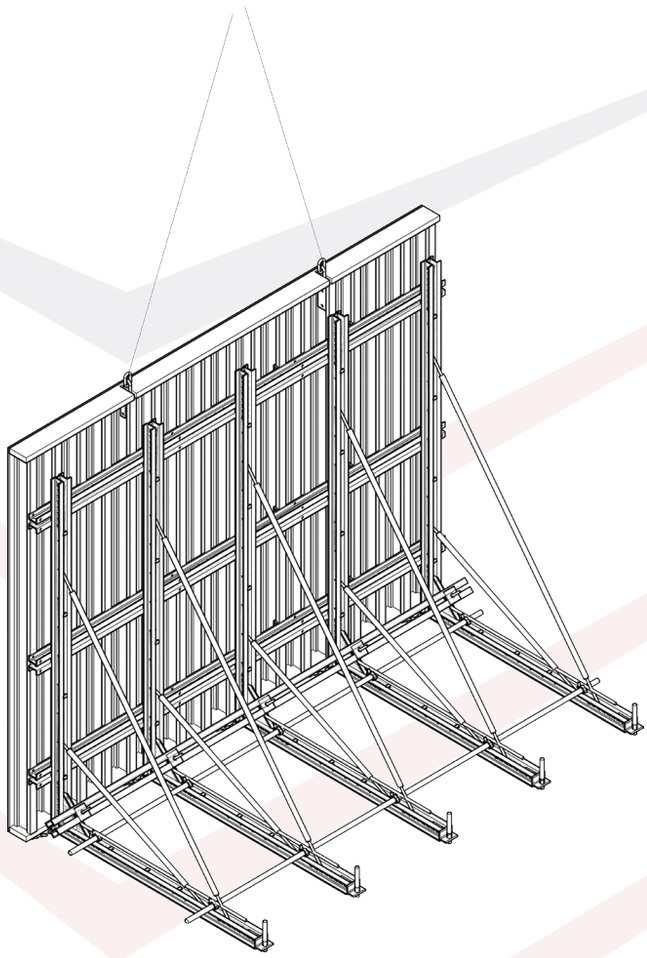

Vertical Solider Overview

Solider and turn buckle up to 4.00 m:

- PPH 206 (3»x4mm)
- Solider # 12
- Connecting plate
- Half coupler C/W bolt and nut
- Pigtail anchor
- She bolt C/W wing nut and steel washer
- Rear jack
- Access bracket for vertical solider

Applications

Vertical Soldier & Turn Buckle Up to 4.00m

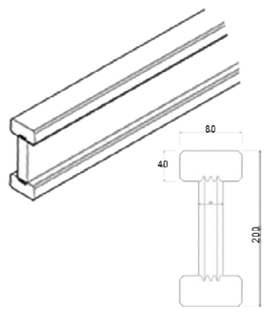

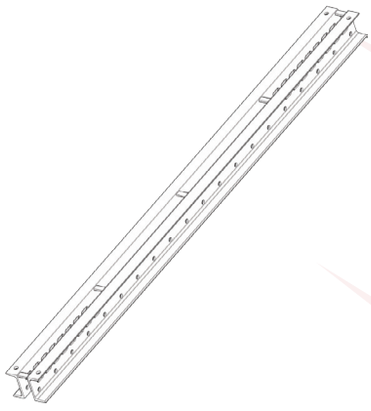

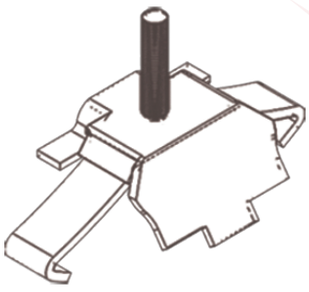

Supporting frame for wall height up to 7.60 m

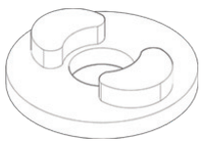

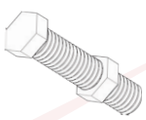

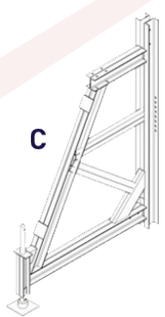

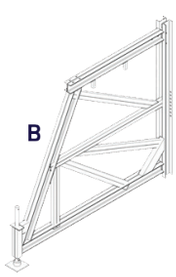

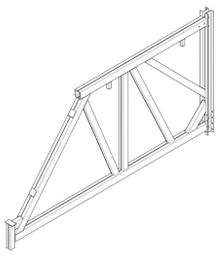

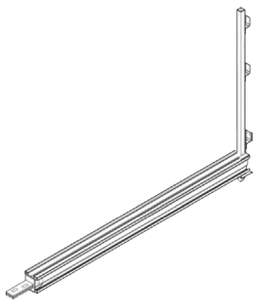

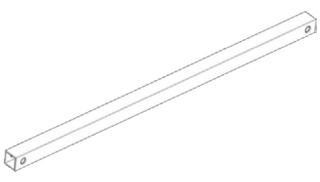

Components

Item	Description	Code no.	Weight (kg)
	Timber H20 Beam
