ACROW
Formwork Technology

Introduction

It can be used either with Acrow soldier , or with double H20 timber beams. Due to high load capacity shorbrace is on of the most economical table system for heavy civil engineering project. Shorbrace table with prop extension is very flexible so it is one of the best systems for building constructions. Shorebrace can be connected to each other so shorebrace table is available to any height. Vertically adjusting can be done either by post head jack in Shorebrace table for heavy structure or by prop extension in Shorebrace table for bulding.

Advantages of system :

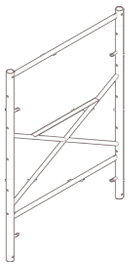
- shorbrace system is heavy duty.
- variable heights can be obtained by using shorbrace system.
- shorbrace system is so limited in lost items because it has so little accessories.
- shorbrace system is easy in erection and dismantling . so it does not need to skilled labor.
- composed of standard components which can be used in different projects,and different system.
- very easy in erection and dismanting results in saving time and labour cost.

Technical Data :

- working load per vertical leg 54.00 kn
- shorbrace telescopic range is from 52.5 cm up to 142.5 cm

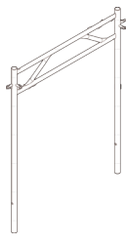
System Components

Shorbrace Frame



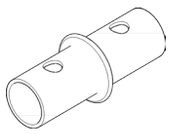
- •It is made from 60.3 mm outside diameter vertical tubes.
  •Shorbrace towers are operational with or without the use of the telescopic shorbrace frame.
  •The Shorbrace frame uses a patented fast action latch for the cross bracing connector and no tools are necessary to lock the bars in position.

Shorebrace Telescopic Frame



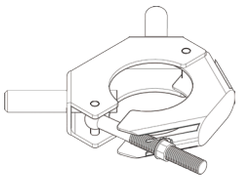
- It is made from 48.3 mm outside diameter vertical tubes By using the shorbrace telescopic frame at the top of the tower Shorbrace system can be adjusted to any height - Range (0.525 m -1.425 m) with 30 cm increment.

Vertical Frame Connector



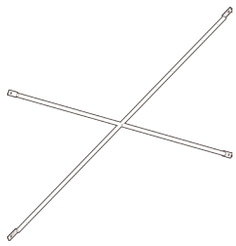
- For vertical interconnection of frames it is provided with 2 holes to receive rivet pins and spring clip.

Shorbrace Coupler



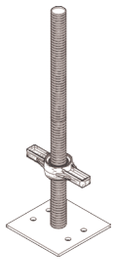
- With two spring clips the shorbrace coupler is used for connecting diagonal cross bracing from shorbrace telescopic frame to shorbrace frame below.

Cross Brace



- These are used to group a number of shorbrace towers together at close spacing to support heavy load concentrations. link spacers also offer an easy and low cost method for closing up the frames where necessary.

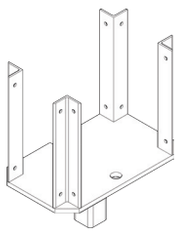
Post.Head Jack



- heavy threaded spindle with big nut can be adjust the shorebrace table system from rang (50 mm - 400mm)

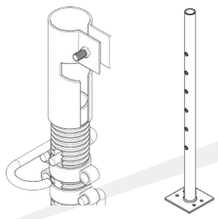
System Components

Table Head

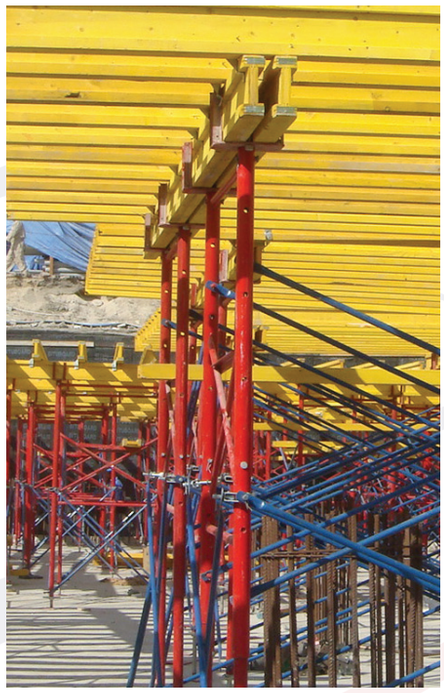


- Fix connection between the shorebrace frame and primary timber H20 (double or single).
  table head connected with shorebrace frame by rivet pin& spring clip.

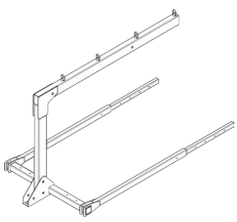
Prop Connection & Prop Inner



- For adjusting the height of shorebrace table from range (0.0 to1.20m).
  Prop inner connected with shorebrace frame by prop connection
  used in shorebrace table form for building with or without beam.

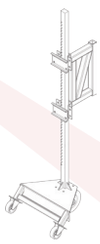


C-Fork



- used for carring and moving shorebrace table from level to other on the construction site by crane.
  the C-Fork is simply attached to the shorebrace table form . load capacity up to 1.00 ton..

Wheel Jack Unit

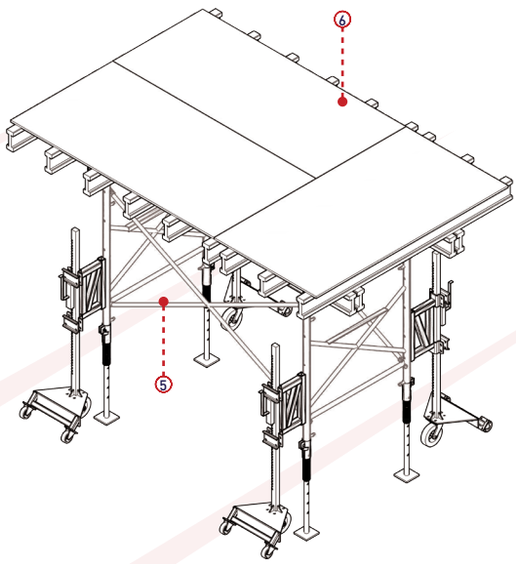


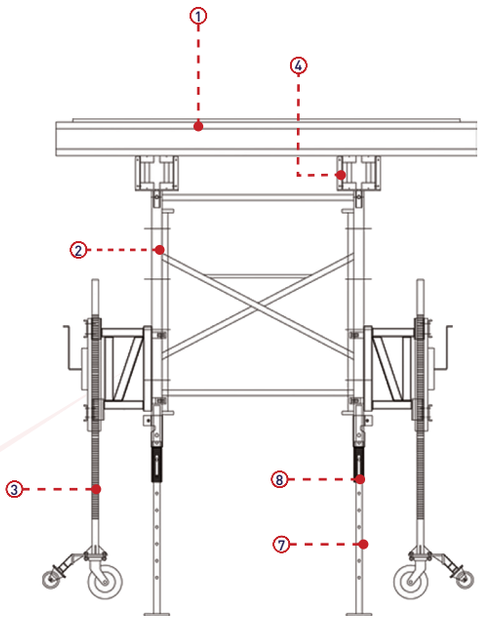
- Mechanical Jacks For Lowering Table form and table horizontal moving available two type 70 cm & 170 cm.

Product Overview

Shore Brace Table System
Decking: Main H20 Timber Beam
Secondary H20 Timber Beam

1-Acrow wooden beams H20
2-Shorbrace frame
3-Wheel jack unit
4-Shorebrace table head
5-Cross brace
6-Plywood
7-Prop inner
8-Prop connection





Product Overview

ShorBrace Table (For Heavy structures)
Decking Main Soldier
Secondary H20 Timber Beam

1-U.Head jack.
2-Timber H20.
3-Soldier][No.12.
4-Shorebrace Frame.
5-Cross brace.
6-Post head jack.
7-H20 Connection.
8-Frame Connector.
